SPECIFICATION

Brief Details of Kit

Nudura ICF supply for 4 No. detached houses (TIPO 2: ground floor + semi-basement, approx. 304 m2 built each) and 4 No. swimming pools (6.0 x 3.0 x 2.0 m deep), taken off from MOTTO Estudio drawings v4.0.0 / v4.1.0. House walls 6in (152 mm core) XR35; semi-basement retaining walls 8in (203 mm core) XR35; pools 6in Standard. The retaining walls are NOT engineered: subject to the structural design they may need to increase to a 10in Standard form. Standard (non pre-cut) forms, cut on site. Each pool is priced as a separate item.

Accessories

Accessories such as VJC Clips, Fibre Tape, Protective Tape, Spray Foam, Form Lock, & T Junction Straps have all been allowed for within this quotation.

Delivery

Delivery to Busot (Alicante) is upon request. From the BuildEase pallet plan the four houses and four pools are estimated at 3 No. 40 ft containers per plot, 12 No. in total (folded forms on 2,400 x 2,400 pallets, four positions per container plus a tail pallet for the part corners). Container load plans are available on request.

BuildEase Pre-Cut Service

The BuildEase pre-cut service is included: every form is modelled in 3D, the cutting is optimised and the kit is delivered cut to size, with the drawings and field support. The four houses are one house type, so the 3D modelling is charged ONCE, on house 8; houses 9, 10 and 11 are repeats of that model and carry the fabrication only. Each pool is modelled within its own house model and carries no separate pre-cut fee.

Lead Time

Our current lead time is 5-6 weeks from placement of order. Our lead time commences once our order form has been returned, construction architectural drawings are received, and structural engineering details are made available to us.
